3. COMPOSITION AND INFORMATION ABOUT THE INGRENDIENTS

Product type:

Product name

: Mixture

Ingrendients that contribute to danger:

Product name	CAS No.	Risck classification	Concentration [%]
TRIGLYCIDYL ISOCYANURATE	2451-62-9	Acute toxicity Ingestion, Category 3 Acute toxicity Inhalation, Category 3 Skin sensitization , Category 1 Specific target organ toxicity - Repeated exposure , Category 2 Hazardous to the aquatic environment - Cronic , Category 3 Germ cell mutagenicity , Category 1B Serious eye damage/eye irritation , Category 1	>= 1 - < 5

4. FIRST AID MEASURES

Inhalation :	Take the victim to fresh air, keeping them rested and warm. If breathing is irregular or has stopped, apply artificial respiration. Do not give anything orally. Seek medical assistance immediately, bringing the product label whenever possible.
Contact with the skin :	Remove all contaminated clothing immediately. Wash affected area with plenty of soap and water.
Contact with the eyes :	Remove contact lenses, if wearing any. Flush the eyes with running water for at least 15 minutes, holding the eyelids apart. Seek medical assistance immediately, bringing the product label with you.
Ingestion	Do not provoke vomiting. Consult with a doctor immediately.
Notes for the doctor :	Treat symptomatically. Do not induce vomiting because of risk of aspiration of gastric contents into the lungs. Gastric lavage is recommended when the patient ingests large quantities of the substance.

5. FIRE-FIGHTING MEASURES

Suitable extinguishing methods	:	Water in mist form Carbon dioxide (CO2) Foam alcohol resistent Dry chemical powder
Extinguishing methods not recommended	:	Direct water jet.
Specific dangers	:	The finely dispersed particles form explosive mixtures in air, in the presence of sparks. Burning forms a thick black smoke. Inhalation of dangerous products of decomposition may cause serious damage to health.
Protective measures of the fire fighting team.	:	The personnel involved in firefighting should wear self contained breathing apparatus with positive pressure and full protection clothes.
Specific methods	:	Evacuate and isolate the area. Approach from fire with wind at your back. Fight the fire to a secure distance. Remove the packaging of the product from the fire area if this can be made with safety. Chill sideways with water in form of fog all the closed packaging near the fire. Avoid that the resulting water from fire fighting reaches drains or waterways. Use dikes to contain this water and eliminate it according to environmental regulations.

6. SPILL / LEAK CONTROL PROCEDURES

Personal precautions, protective equipment and emergency procedures

For the emergency service staff	:	If specialized clothing is needed to combat the leak/spillage, Section 8 should be consulted. All precautions described in the following section must be followed.
For staff who are not part of the emergency services	:	No action should be taken that may generate danger to people without adequate training and qualifications. Use appropriate personal protective equipment - see section 8. Evacuate surrounding areas. Isolate area and keep onlookers away. Do not touch or walk through spilled material. Eliminate all sources of ignition.Avoid breathing vapor or mist. Provide adequate ventilation if possible. Wear appropriate respiratory mask when ventilation is inadequate.In accordance with characteristics of the location and/or area and in relation to the amount of spilled/leaked product, additional emergency measures may be taken under the supervision of a trained

		professional.			
Environmental p	recautions :	Prevent spilled/leaked p waterways, drains and sew in accordance with current environmental damage.		e relevant authorities	
Methods and mat	erials for cont	ainment and cleaning			
Large spills / lea	ks :	Stop the leak if this can be of tarp to prevent the spread be tools and explosion-proof en- collect the product. Place the and properly identified contars so removing them from the Remove the packaging from disposal need refer to chapt	y wind or rain quipment prop e material col ainers. Cap th spill site. Avoi n the spill site.	. Use antifaiscantes berly grounded to lected in dry, clean e container loosened d formation of dust.	
Small spills / lea	ks :	The collected material can r favorable conditions. Otherv appropriate disposal.			
Dust control	:	Consult section 13.			

7. HANDLING AND STORAGE

Precautions for safe handling

Instructions for safe : treatment	Avoid contact with eyes, skin and clothes.Do not handle the product before reading and understanding all safety precautions.Do not re-use packaging.Refer to special instructions before use.Avoid inhalation of the powder.Do not eat, drink or smoke during use.
Precautions for safe : handling	Use individual protective equipment.Environments and areas that will be used for electrostatic spraying of powder paints must provide controlled ventilation. Through controlled ventilation it must be ensured that the air in the inhalation scope is be healthy from a health point of view (see limits in Section 8). Avoid sources of ignition and dust deposition in the environment. Antistatic clothes and shoes are recommended. Emergency showers and eye wash basins must be installed in locations of use and storage.
Fire protection :	Tools that do not produce sparks should be used. Keep away from heat and sources of ignition.Do not smoke.Avoid accumulation of electrostatic charges.All conductive elements of the system, in contact with the product, must be electrically groundedOnly use in well-ventilated locations, to prevent

accumulation of powder in explosive concentrations.

8. EXPOSURE CONTROL – PERSONAL PROTECTION

The information in this chapter contain general guidelines. Chapter 1 should be consulted for any information on the recommended use of this product in different scenarios of exposure.

Engineering control " measures	Preferably use the product in adequate application cabin. In case it is not possible, provide exhaustion/ventilation enough to keep the concentration of the agents indicated in this section under the limits of tolerance (L.T.), otherwise, use adequate respiratory protection equipment. The engineering controls should keep the concentrations of gas/vapour under the limit of LEL - Lower Explosive Limit (see section 9). Use equipment explosion proof.
-----------------------------------	---

Control parameters

Occupational Exposure Limits

Last revision: 23.04.2020

Page: 7 of 12

Name	CAS No.	TLV/TWA	TLV/STEL	TLV/TETO	Source
TRIGLYCIDYL	2451-62-9	0,05 mg/m ³			ACGIH
ISOCYANURATE		_			

*PPM - parts of vapour or gas per million of parts of contaminated air

**MG/m³ - miligrams per cubic meter of air.

Personal protective equipment required

i cisonai protective equipinen		cquircu
Respiratory protection	:	If the powder is above the tolerance limits (seeengineering control measures, above) a dust mask must be used, suitable for this purpose (P2 particle filter). Occasionally other respiratory protective equipment may be used.
Hand protection	:	Protective creams can be used to protect exposed skin areas together with latex or nitrile gloves (never used after the exposure has occurred).
Eye protection	:	Use hermetic goggles to protect against powder spray.
Body and skin protection	:	Antistatic clothes and shoes are recommended.

9. PHYSICAL AND CHEMICAL PROPERTIES

Form	:	Dust
State of matter	:	Solid
Color	:	Gray
Odour	:	Weak and distinctive

10. STABILITY AND REACTIVITY

Reactivity	:	Presents no reactivity at room temperature and under normal conditions of use.
Chemical stability	:	Stable at room temperature and under normal conditions of use.
Possibility of dangerous reactions	:	Presents no reactivity at room temperature and under normal conditions of use. None when the product is stored, applied and processed correctly. Otherwise, the mixture powder air mixture could ignite.
Need to add additives and inhibitors	:	Not necessary.
Conditions to avoid	:	Extreme heat and open flame.
Incompatible materials	:	Do not store with explosive materials, flammableand/or toxic gases, oxidizing, corrosive substances, or materials that may generate spontaneous combustion.
Dangerous products of decomposition	:	High temperatures (above 300°C) could result in dangerous products of decomposition, such as carbon dioxide and smoke. Triglycidylisocyanurate can polymerize under the

Acute toxicity

Powder coatings are generally inert dusts . No data are available on acute toxicity for the product. Powder coatings can cause irritation located in the skin, especially in skin folds or use of tight clothes . People allergic or respiratory problems should not work in the powder application. Repeated or prolonged contact with the product may cause removal of natural fat from the skin, resulting in non allergic contact dermatitis and skin absorption. The product that comes into contact with the eyes can cause irritation.

Chronic toxicity

On the skin, prolonged contact leads to degreasing, may cause fissures, dryness, dermatitis and eczema. The respiratory system may be affected by chronic bronchitis and decreased respiratory volume. Exposure of pregnant women to concentrations above the limit can present threat of abortion. In contact with eyes, do not rub, wash with running water for at the least 15 minutes.

12. ECOLOGICAL INFORMATION

Stability in soil	:	Data not available.
Elimination of chemical physical ability	:	Not considered potentially bioaccumulative.
Other toxicological observations	:	Data not available.
Ecotoxicity	:	Detrimental to the flora. Detrimental to the fauna Contaminates the ground water.

13. DIOSPOSAL AND TREATMENT CONSIDERATIONS

Recommended methods for final disposal

Product	Class II Waste - Dispose of in industrial landfill or a facility authorized for recycling in accordance with federal, state or local regulations.
Waste	 Class II Waste - Dispose of in industrial landfill or a facility authorized for recycling in accordance with federal, state or local regulations.
Used packaging :	Clean packaging should be sent for recycling. Packaging with class II waste should be disposed of in industrial landfill or a facility authorized for recycling in accordance with federal, state orlocal regulations

14. TRANSPORTATION INFORMATION

fNational and international regulations

Land : Not classified as a dangerous good under transport regulations.

- Shipping : Not classified as a dangerous good under transport regulations.
- Air transport : Not classified as a dangerous good under transport regulations.

Important information, but not specifically described in the previous sections: This MSDS was prepared based on current knowledge about the handling of the product under normal conditions of use, according to the application specified on the packaging and recommended usage in Section 1 of this MSDS. Any other use of the product involving its combination with other materials, as well as forms of use different from those indicated, are the user's responsibility. The company advises that the handling of any chemical substance requires prior knowledge of its hazards by the user. In the workplace it is responsibility of the company user of the product to provide training of its employees and contractors about the possible risks arising from exposure to the chemical.

We reserve the right to change the information contained in this document without prior notice, due to the improvement and continuous evolution of the product and technical knowledge.
