PRODUCT AND COMPANY IDENTIFICATION Product name W-FAST 5514 : Code 12775841 : Uses in coatings - Curing agent for component A. Main recommended uses 1 Address Rodovia BR 280 - km 50 : CEP 89270-000, Guaramirim - SC Telephone : +55 47 3276-4000 Emergency telephone : 0800 720 8000 number E-mail / site : tintas@weg.net | www.weg.net 2. HAZARD IDENTIFICATION Mixture classification Flammable liquids Category 3 5 Acute toxicity(Inhalation) Category 4 Skin Corrosion/irritation Category 3 2 Serious eye damage/eye Category 2A : irritation Respiratory sensitization Category 1 : Skin sensitization : Category 1 Specific target organ toxicity - : Category 3(May cause respiratory irritation.) Single exposure

Classification according to NBR 14725-2/2019

## Labelling Elements

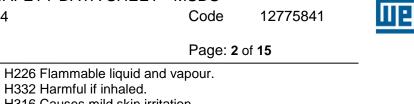

Warning phrase Danger t

Product name

Last revision:

14.08.2020

Hazard phrases	<ul> <li>H226 Flammable liquid and vapour.</li> <li>H332 Harmful if inhaled.</li> <li>H316 Causes mild skin irritation.</li> <li>H319 Causes serious eye irritation.</li> <li>H334 May cause allergy or asthma symptoms or breathin difficulties if inhaled.</li> <li>H317 May cause an allergic skin reaction.</li> <li>H335 May cause respiratory irritation.</li> </ul>
Caution Phrases	: <b>Prevention:</b> P210 Keep away from heat, hot surfaces, sparks, open flame and other ignition sources. No smoking.
	P233 Keep container tightly closed.
	P240 Ground/bond container and receiving equipment.
	P261 Avoid breathing dust/ fume/ gas/ mist/ vapours/ spray.
	<b>Reaction:</b> P303+P361+P353 IF ON SKIN (or hair): Take off immediatel all contaminated clothing. Rinse skin with water/shower.
	P304+P340 IF INHALED: Remove person to fresh air and kee comfortable for breathing.
	P333+P313 If skin irritation or a rash occurs: Ge medicaladvice/attention.
	P337+P313 If eye irritation persists get medica advice/attention.
	P342+P311 If experiencing respiratory symptoms: Call POISON CENTER/doctor.
	P362+P364 Take off contaminated clothing and wash it befor reuse.
	P370+P378 In case of fire: Use as chapter 5 of MSDS t extinguish.
	<b>Storage:</b> P403+P233 Store in a well ventilated place. Kee containertightly closed.
	P403+P235 Store in a well ventilated place. Keep cool.
	Treatmentand disposal of waste:

#### Treatmentand disposal of waste:

P501 Dispose of contents/container as chapter 13 of the MSDS.

## 4. FIRST AID MEASURES

Inhalation :	Take the victim to fresh air, keeping them rested and warm. If breathing is irregular or has stopped, apply artificial respiration. Do not give anything orally. Seek medical assistance immediately, bringing the product label whenever possible.
Contact with the skin :	Remove the product with vegetal oil (cooking oil) and then wash the skin thoroughly with plenty of water. Do not use solvents or thinners. Seek medical attention in case of any irritation or other symptoms.
Contact with the eyes	Remove contact lenses, if wearing any. Flush the eyes with running water for at least 15 minutes, holding the eyelids

- Ingestion
   : Do not provoke vomiting. Consult with a doctor immediately.
- Most important symptoms : Headaches, dizziness, fatigue and in extreme cases, loss of consciousness. delayed
- Notes for the doctor : Treat symptomatically. Do not induce vomiting because of risk of aspiration of gastric contents into the lungs. Gastric lavage is recommended when the patient ingests large quantities, more than 5ml of the substance in its pure form. The toxic potential of the quantity consumed must be evaluated in relation to the risk of aspiration during gastric lavage. Activated coal in solution could be useful. However, in some cases the coal induces vomiting.

	5. FIRE-FIGHTING MEASURES
Suitable extinguishing methods	: Water in mist form Carbon dioxide (CO2) Foam alcohol resistent Dry chemical powder
Extinguishing methods not recommended	: Direct water jet.
Specific dangers	: Flammable liquid and vapour. Dangerous when exposed to heat or ignition source. Exposed packaging to the fire may rupture due to the increased pressure with risk of a subsequent explosion. The vapours are havier than the air and spread close to the ground and it can move to the ignition source and provoke fire or backspace of the flames. Avoid the accumulation of vapours in depressions on the ground, manholes, basement etc. The vapours and/or the particles finely divided (spray) may form explosive mixtures with the ai In case of burning of the product, it forms carbon and nitroger

### 6. SPILL / LEAK CONTROL PROCEDURES

Personal precautions, protective equipment and emergency procedures

For the emergency service staff	: If specialized clothing is needed to combat the leak/spillage, Section 8 should be consulted. All precautions described in the following section must be followed.	
For staff who are not part of the emergency services	: No action should be taken that may generate danger to people without adequate training and qualifications.Understand the dangers of leaked/spilled products. Use appropriate personal protective equipment - see section 8. Evacuate surrounding areas. Isolate area and keep onlookers away. Do not touch or walk through spilled material. Eliminate all sources of ignition.Avoid breathing vapor or mist. Provide adequate ventilation if possible. Wear appropriate respiratory mask when ventilation is inadequate.In accordance with characteristics of the location and/or area and in relation to the amount of spilled/leaked product, additional emergency measures may be taken under the supervision of a trained professional.	
Environmental precautions	: Prevent the product or the water used in the service reaches waterways, channels, drains, or galleries. In case of significant spill, retain spi lled liquid with inert material such as sand or earth. In approprieate, use absorbent materials such as rags, vermiculites, etc.	
Methods and materials for containment and cleaning		
Large spills / leaks	: Understand the dangers of leaked/spilled products.	

Large spills / leaks: Understand the dangers of leaked/spilled products.<br/>Approaching the site with the wind from behind. Stop leak if<br/>this can be done safely. Confine the spill in a dike away from<br/>the leak point for later disposal. Remove local packaging from

Product name	W-FAST 55	54FETY DATA SHEET - MSDS 14 Code 12775841

		the spills site. Preferably use anti sparkling tools to collect the product. All equipment used when handling the product must be electrically grounded. Soak up with an inert dry material (sand, vermiculite) placing the same in a suitable container for later disposal - see chapter 13.
Small spills / leak	s :	Stop the leak if this can be done safely.Cover up spillage in a tarp to prevent the spread by wind or rain. Use antifaiscantes tools and explosion-proof equipment properly grounded to collect the product. Place the material collected in dry, clean and properly identified containers. Cap the container loosened so removing them from the spill site. Avoid formation of dust. Remove the packaging from the spill site. If there is product disposal need refer to chapter 13
		Contain and collect the material of the leak with absorbent materials and non-combustible, such as sand, earth, vermiculite, calcined diatomite, etc. in a waste container in accordance with local regulations.
Dust control	:	Not applicable
	_	
Precautions for sa		. HANDLING AND STORAGE
Instructions for s treatment	-	Avoid contact with eyes, skin and clothes.Do not re-use packaging.Do not eat, drink or smoke during use.Do not handle the product before reading and understanding all safety precautions.
Precautions for s handling	afe :	Use appropriate personal protective equipment - see section 8; The product handling should occur in places with good natural ventilation or with the presence of local exhaust ventilation; The electrical installations must comply with the International Electrical Commission Standards (IEC), ABNT Standards (Brazilian Association of Technical Standards), taking into account the results of the classification area study for the local and/or product instalation. Use anti-sparking tools when handling the product; In transfer operations, metal containers must be used and all containers must be properly grounded to avoid sparkling by the accumulation of static energy; Handle and use away from hot surfaces, sparks, open flames, and other sources of ignition. Do not smoke;Do not ingest. Avoid inhalation of vapors or smoke as well as avoid contact with eyes, skin and clothing; Eating and drinking should be prohibited in the area where the material is handled, stored and processed. Workers should wash their hands before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering food areas; After use keep the product in its original packaging, sealed; Empty containers may be hazardous and should be disposed of properly. Do not reuse the packaging;Emergency showers and eye washer should be installed in the use and storage places. Do not handle the product until you have read and understood

## 8. EXPOSURE CONTROL – PERSONAL PROTECTION

The information in this chapter contain general guidelines. Chapter 1 should be consulted for any information on the recommended use of this product in different scenarios of exposure.

Engineering control measures	<ul> <li>Preferably use the product in adequate application cabin. In case it is not possible, provide exhaustion/ventilation enough to keep the concentration of the agents indicated in this section under the limits of tolerance (L.T.), otherwise, use adequate respiratory protection equipment. The engineering controls should keep the concentrations of gas/vapour under the limit of LEL - Lower Explosive Limit (see section 9). Use equipment explosion proof.</li> </ul>

## **Control parameters**

## **Occupational Exposure Limits**

Name	CAS No.	TLV/TWA	TLV/STEL	TLV/TETO	Source
ALIPHATIC	28182-81-2				ACGIH
POLYISOCYANATE					
BUTYL ACETATE	123-86-4	50 ppm	150 ppm		ACGIH
ABSORBING	4083-64-1				
MOISTURE ADDITIVE					
HEXAMETHYLENE	822-06-0	0,005 ppm			ACGIH
DIISOCYANATE					

\*PPM - parts of vapour or gas per million of parts of contaminated air

\*\*MG/m<sup>3</sup> - miligrams per cubic meter of air.

#### Personal protective equipment required

Respiratory protection	:	In case of the concentrations are above the indicated tolerance limits, the use of appropriated mask is necessary for this goal (half-face mask or full face mask with filter to organic vapors and acid gases).
Hand protection	:	Use nitrilic gloves associated with the use of the adequate protection cream
Eye protection	:	Use hermetic goggles to protect against liquid splashes.
Body and skin protection	:	It is recommended the use of apron barber type to protecting upper limbs, trunk and lower limbs in case of splash. In case of risk of static electricity generation the cloth should be antistatic, includin the apron.

## **10. STABILITY AND REACTIVITY**

Reactivity :	Presents no reactivity at room temperature and under normal conditions of use.
Chemical stability :	Stable at room temperature and under normal conditions of use. Unstable at temperatures above the flash point.
Possibility of dangerous : reactions	Presents no reactivity at room temperature and under normal conditions of use. None when the product is stored, applied and processed correctly.
Need to add additives and inhibitors	Not necessary.
Conditions to avoid	Extreme heat and open flame.
Incompatible materials :	Do not store with explosive materials, flammableand/or toxic gases, oxidizing, corrosive substances, or materials that may generate spontaneous combustion. Plastic materials soluble in Xylene.
Dangerous products of the composition	Produces noxious gases such as carbon monoxide (CO), carbon dioxide (CO2) and nitrogen oxides (NOx).

Important information, but not specifically described in the previous sections: This MSDS was prepared based on current knowledge about the handling of the product under normal conditions of use, according to the application specified on the packaging and recommended usage in Section 1 of this MSDS. Any other use of the product involving its combination with other materials, as well as forms of use different from those indicated, are the user's responsibility. The company advises that the handling of any chemical substance requires prior knowledge of its hazards by the user. In the workplace it is responsibility of the company user of the product to provide training of its employees and contractors about the possible risks arising from exposure to the chemical.

We reserve the right to change the information contained in this document without prior notice, due to the improvement and continuous evolution of the product and technical knowledge.
