

Parts & Service

Remanufactured Bearings & Seals

Bearings

- Using existing casing, the bearing is centrifugally re-babbitted using all new “virgin” turbine grade babbitt.
- Repair process offers remanufactured bearings to OEM tolerances. All internal dimensions are to OEM specifications.
- Bond integrity is checked by certified Level II trained technicians.
- Emergency turn around times in less than a week.
- The best approach to minimal downtime is to have a spare and remanufacture the failed bearing for a future spare.

Emergency Seals REDUCE DOWN TIME!

- Original seal is re-toothed. This can be preformed in less than a week with emergency service available on weekends and holidays.
- When a replacement isn't available, this is the fastest alternative.
