Distribution boards with guaranteed performance increase the quality of your installations.

FLEXIBILITY AND SAFETY

IN ELECTRICAL DISTRIBUTION FOR YOUR BUSINESS

Designed for all kinds of requirements, the TTW01-QD distribution boards are available in surface-mount and flush-mount versions and currents up to 630 A. Safety, robustness, flexibility and convenience are characteristics that define the design of these boards. They are manufactured in accordance with the requirements of IEC 61439-1/2/3 standard.

Benefits

Simplified
installation
and operations

Unique reliability
of type-tested
assemblies

Robust and
compact
frame

In compliance with
the applicable safety
standards

Testing

To ensure safety, performance and reliability, electrical panels must be subjected to type and routine testing, according to the guidelines of IEC 61439-1/2/3 standard. Type tests, which are carried out by the original manufacturer and are mostly destructive, check the structure and performance of the panel. Routine tests, which are carried out by the panel builder after the assembly, check that the panel meets the requirements established in the design.

Type tests

No.	Characteristic to be checked
1	Resistance of materials and parts: - Corrosion resistance
	Properties of the insulating materials: - Thermal stability - Resistance of the insulating material against abnormal heat and fire due to the internal electrical effects
	Resistance to ultraviolet radiation (UV)
	Lifting
	Mechanical impact
	Marking
2	Enclosure protection rating
3	Clearance distances
4	Creepage distances
5	Protection against electric shock and integrity of the protection circuits: - Effective continuity between exposed conductive parts of the ASSEMBLY and the protection circuit - Short circuit withstand capacity of the protection circuit
6	Switchgear and component integration
7	Internal electrical circuits and connections
8	Terminals for external conductors
9	Dielectric properties: - Withstand voltage at industrial frequency - Impulse withstand voltage
10	Temperature rise limits
11	Short circuit withstand capacity
12	Electromagnetic Compatibility (EMC)
13	Mechanical operation

Routine tests

No.	Characteristic to be checked
1	Protection rating check
	Clearance and creepage distances
	Protections against electric shock and integrity of the protection circuits
2	Built-in component integration
	Internal electrical circuits and connections
	Terminals for external conductors
	Mechanical operation
3	Dielectric properties
	Cabling, operating performance and function

Applications

With innovative technology and modern design, the TTW01-QD is ideal for your requirements. Its flexible design allows assemblies that meet a great variety of electrical systems requirements.

Shopping malls

Hospitals

Commercial buildings

Schools and residential buildings

TTW01-QD has a special offer for environments that need antimicrobial protection: painting with White NobaC® topcoat. Ideal for hospitals, schools and other places that need to reduce costs and risks generated by infections or cross-contamination caused by microbes and bacteria.

General characteristics

Performance assurance

- Standardized metallic boards, allowing faster mounting and greater robustness in handling and maintenance
- The boards are tested with load in order to assess their thermal performance and heat dissipation capacity
- Short circuit tests ensure the operation safety of the boards, preventing the exposure of people to risks during an abnormality in the electric operation
- Removable flanges on top and bottom of the board simplify the execution of entry and exit of cables, conduits and cable trays, helping to organize and keep the internal space well used

The TTW01-QD is entirely designed in Brazil.

All boards fully meet the requirements of
IEC 61439-1/2/3
standard

Flexible and fast assembly

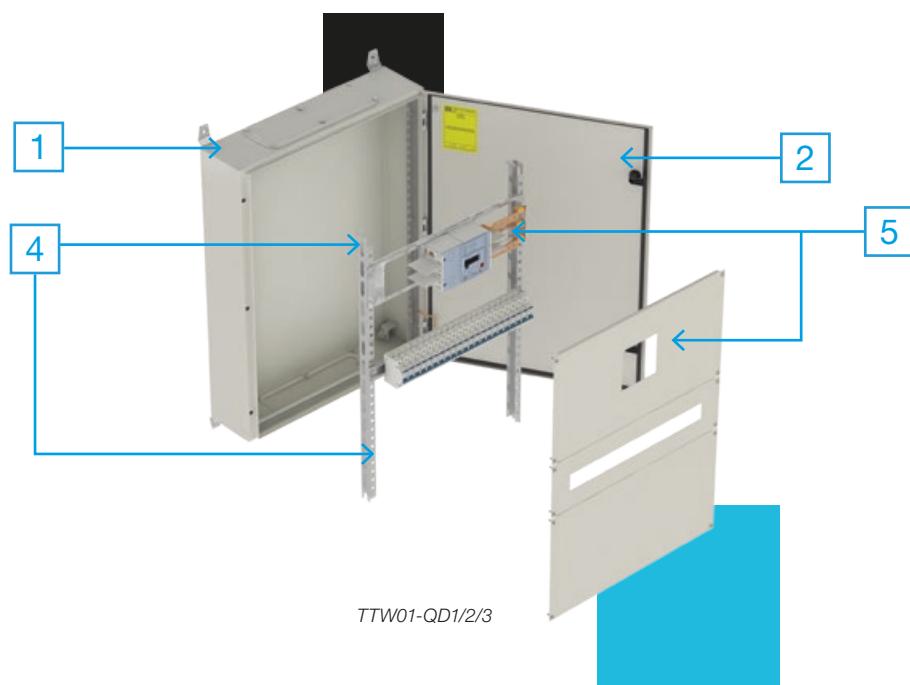

- Boards in different sizes and depths
- Modularity and interchangeability of assembly kits among TTW01-QD electrical panels
- Wide range of mounting kits, allowing a great variety of arrangements
- Assembly kits made of galvanized steel sheets
- Mobile racks that allow assembling the components out of the board. Such characteristic allows the board frame to go to the customer/site, while the panel builder installs the electric components on the rack. Completed that task, it is just necessary to install the rack on the board already sent to the site
- **Casters that allow moving the assembly rack, simplifying the installation of incoming and outgoing cables**
- TTW QD configurator that allows quick sizing and definition of all parts that compose the board
- Fast replacement or complement of board pieces and parts
- Versatility for special assemblies, when not using standardized kits by using blank mounting plates
- **Latches that can fit a padlock to lock the board door**

Construction features

The TTW01-QD was designed to be supplied in modular kits that can be classified as follows:

- | | |
|----------|--|
| 1 | Frame for flush-mount or surface-mount |
| 2 | Door and cover plate with finishing accessories |
| 3 | Removable rack with DIN rails for installation of the modular line (MDW, SPW, RDW) |
| 4 | Removable rack for installing mechanical kits |
| 5 | Mechanical kit for installation of electrical equipment |

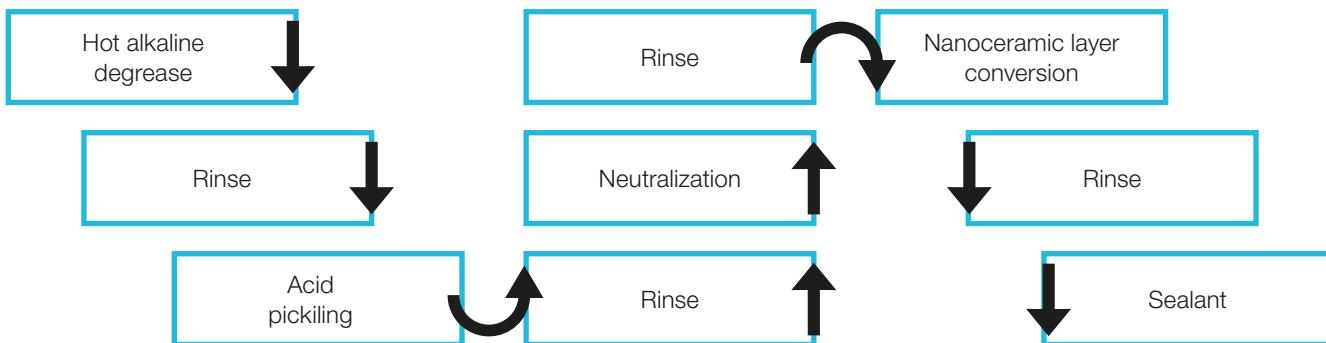

Preparation and topcoat

The high quality and very durable coating of WEG panels and boards are the result of the continuous development of supplies in industrial areas with different environmental characteristics. The steel sheet treatment process uses tricationic phosphate (formula based on zinc, nickel and manganese salt phosphates), ensuring high corrosion resistance and excellent adhesion to the topcoat. The 80 µm thick light gray RAL 7035 polyester powder topcoat is applied in an electrostatic process.

The treatment and coating of the metal plates follow the sequence below:

Executed within strict quality control, it follows the procedure:

The quality, strength and durability of the coating are guaranteed by the following tests:

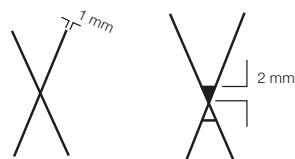

Performance characteristics		
Description	Testing reference and standard	Acceptance criteria evaluated
Adhesion degree	ASTM D 3359 - 97	X1Y1 ¹⁾
Salt spray resistance	ASTM B117	500 hours
Resistance to SO ₂	DIN 50018	15 cycles / 24 hours
Resistance to immersion in distilled water	ASTM D870	24 hours
Resistance to UV-A	ASTM D4587	500 hours

Note: 1) Adhesion test acceptance criteria.

Such criteria apply to coatings thicker than 70 µm.

After placing a piece of adhesive tape on the structure to be tested, two "X" cuts must be made. The expected results for the coating approval are:

X1 = Cut in "X" with maximum 1 mm wide coating spacing.

Y1 = Paint detachment from 1 to 2 mm on one or both sides of the intersection.

Topcoat

Description	Finish color	Surface treatment	Minimum thickness of the coat	Coating type
Frames with coating	Microtextured gray RAL 7035	Phosphate coating chemical process	80 µm	Polyester powder by electrostatic process
	Textured gray RAL 7032			
	Textured gray Munsell N6.5			
	Smooth white Munsell N9.5			
	Textured white RAL 9003			
	Smooth Nobac Munsell N9.5 (antimicrobial)			
Frames without coating	-	Galvanized plates	-	-

Offer portfolio

2 basics boards types are available:

- TTW01-QD0 - Up to 125 A. Dedicated installation of miniature circuit breakers and the entire modular line with DIN rail mounting, for example, MDW, MDWH, SPW, RDW, etc.
- TTW01-QD1, 2 and 3 - Up to 630 A. Mechanical kits for various assemblies using the entire WEG control and protection line.
- Flush-mount and surface-mount boards in different sizes according to the table below:

Model ¹⁾	Mounting	Number of poles ¹⁾	Color availability ^{2,3)}	Internal dimensions H x W x D (mm)
TTW01-QD0-2L-E	Flush-mount	36 (2L x 18P)		450 x 450 x 85
TTW01-QD0-3L-E	Flush-mount	54 (3L x 18P)		600 x 450 x 85
TTW01-QD0-4L-E	Flush-mount	72 (4L x 18P)		750 x 450 x 85
TTW01-QD0-5L-E	Flush-mount	120 (5L x 24P)		900 x 600 x 85
TTW01-QD0-7L-E	Flush-mount	168 (7L x 24P)		1,200 x 600 x 85
TTW01-QD1AE	Flush-mount	72 (3L x 24P)	Gray RAL 7035	500 x 600 x 150
TTW01-QD1BE	Flush-mount	120 (5L x 24P)	Gray RAL 7032	800 x 600 x 150
TTW01-QD1CE	Flush-mount	168 (7L x 24P)	Gray Munsell N6.5	1,100 x 600 x 150
TTW01-QD0-2L-S	Surface-mount	36 (2L x 18P)	Smooth White Munsell N9.5	450 x 450 x 85
TTW01-QD0-3L-S	Surface-mount	54 (3L x 18P)	Smooth White RAL 9003	600 x 450 x 85
TTW01-QD0-4L-S	Surface-mount	72 (4L x 18P)	Smooth White Nobac Munsell N9.5	750 x 450 x 85
TTW01-QD0-5L-S	Surface-mount	120 (5L x 24P)		900 x 600 x 85
TTW01-QD0-7L-S	Surface-mount	168 (7L x 24P)		1,200 x 600 x 85
TTW01-QD1AS	Surface-mount	72 (3L x 24P)		500 x 600 x 150
TTW01-QD1BS	Surface-mount	120 (5L x 24P)		800 x 600 x 150
TTW01-QD1CS	Surface-mount	168 (7L x 24P)		1,100 x 600 x 150
TTW01-QD2BS	Surface-mount	120 (5L x 24P)		800 x 600 x 250
TTW01-QD2CS	Surface-mount	168 (7L x 24P)		1,100 x 600 x 250
TTW01-QD2DS	Surface-mount	216 (9L x 24P)		1,400 x 600 x 250
TTW01-QD3CS	Surface-mount	245 (7L x 35P)		1,100 x 800 x 350
TTW01-QD3DS	Surface-mount	315 (9L x 35P)		1,400 x 800 x 350

Notes: 1) L = line for horizontal assembly of the modular family (MDW, MDWH, SPW, DRW etc.);

P = Pole = width equivalent to 18 mm.

2) TTW01-QD0 board model come in the standard smooth color Munsell White N9.5.

TTW01-QD1/2/3 board models come in standard Gray RAL 7035.

Other colors available are optional.

White Munsell N9.5 optional only for TTW01-QD0.

White RAL 9003 optional only for TTW01-QD1/2/3.

3) Check the enclosure color availability according to the following tables.

General requirements

The table below lists the general requirements for sizing a TTW01-QD board:

Requirements	QD0	QD1	QD2	QD3
Maximum number of poles (modular line - MDW, MDWH, SPW, RDW etc.)	168	168	216	315
Maximum rated current (In)	125 A	250 A	400 A	630 A
Application of the modular line (MDW, MDWH, SPW, RDW etc.)	Yes	Yes	Yes	Yes
Application of the modular line and molded case circuit breakers (MDW, MDWH, SPW, RDW, DWB and AGW)	No	Yes	Yes	Yes
Special assemblies on mounting plates	No	Yes	Yes	Yes
Installation of pushbuttons, selectors and pilot lights on the door (CSW)	No	No	Yes	Yes

Overview of TTW01-QD panels

Complete boards

The complete TTW01-QD distribution boards are supplied with a frame, rack, cover plates, door and door grounding cable.

Notes: 1) Full board = frame + rack + door.

2) For construction details, refer to the product manual.

3) TTW01-QD0 board models come in the standard Smooth White Munsell N9.5.

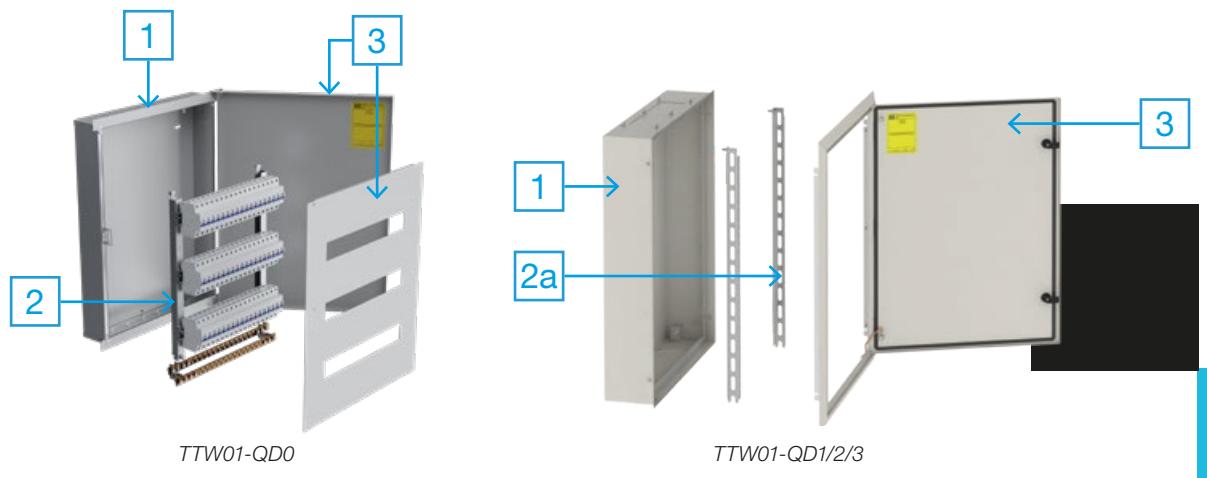

TTW01-QD1/2/3 board models come in standard Gray RAL 7035.

Other colors available are optional.

Overview of TTW01-QD boards

Partial boards

The TTW01-QD partial distribution boards are delivered disassembled and in individual items. Frame, rack and door supplied separately.

Supply of size 1 board separated in the parts: (1) Frame, (2) Rack and (3) Door

1	Frame
2	Rack with DIN rail
2a	Rack for installing mechanical kits
3	Door (for TTW01-QD0, the cover plate is supplied with the door)

Notes: 1) For construction details, refer to the product manual.

2) TTW01-QD0 board models come in the standard Smooth White Munsell N9.5.

TTW01-QD1/2/3 board models come in standard Gray RAL 7035.

Other colors available are optional.

Overview of mechanical kits, cables, busbars and accessories

Mechanical kits

To allow the installation of DWB and AGW circuit breakers, MDW and MDWH miniature circuit breakers and other protection and switching devices, dedicated mechanical kits were developed. The table below lists the kits available for the different types of TTW01-QD boards:

Description	Application				Topcoat					
	QD0	QD1	QD2	QD3	GRAY RAL-7035	GRAY RAL-7032	GRAY MUNSELL N6.5	WHITE RAL-9003	WHITE NOBAC MUNSELL N9.5	GALVANIZED

TTW configurator

As a complementary design tool for the TTW01-QD, WEG developed the TTW configurator, which allows sizing all the mechanics of the board. Easy to access and use, it is a free tool available on our website to all TTW panel builders. This configuration software allows the TTW panel builder to design the panel and have a bulletin of materials, a layout of the board in DWG and its datasheet. Thus, errors are eliminated, and the characteristics required by standard are maintained. As an example, below are 2 dimensioning screens of the TTW01-QD.

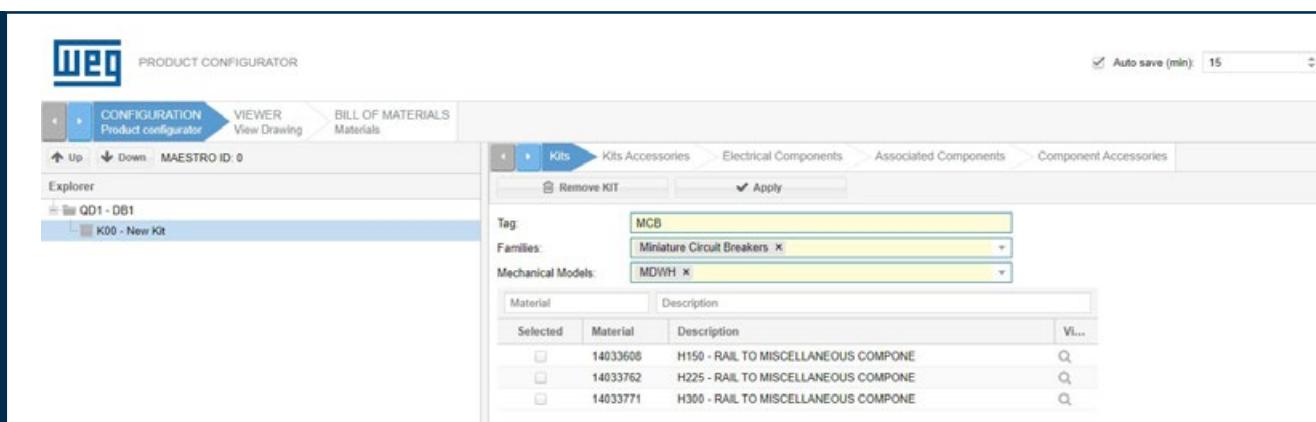

Board configuration home screen:

- Input of the board electrical data and characteristics

Mechanical kit selection:

- Definition of kits to be applied to the board, when necessary

Technical characteristics

Description	TTW01-QD0-2L	TTW01-QD0-3L	TTW01-QD0-4L	TTW01-QD0-5L	TTW01-QD0-7L	TTW01-QD1A	TTW01-QD1B	TTW01-QD1C	TTW01-QD2B	TTW01-QD2C	TTW01-QD2D	TTW01-QD3C	TTW01-QD3D															
Number of poles	36	54	72	120	168	72	120	168	120	168	216	245	315															
Application	Modular line only (DIN rail mounting)					According to mechanical kits available (molded case circuit breaker and modular line)																						
Rated continuous duty current (InA)	125 A					250 A			400 A			630 A																
Rated conditional short-circuit current (Icc)	10 kA					10 kA			16 kA																			
Rated insulation voltage (Ui)	500 V ac					690 V																						
Voltage applied at industrial freq.	1,890 V ac																											
Rated operational voltage (Ue)	440 V ac / 250 V dc					Up to 690 V																						
Rated frequency	60 Hz					60 Hz																						
Rated impulse withstand voltage (Ui _{imp})	4 kV					8 kV (4 kV with MDW)																						
Pollution degree	3																											
Access	Front																											
Mounting	Flush-mount and surface-mount					Flush-mount and surface-mount			Surface-mount																			
Internal separation forms	Not applicable																											
Dimensions (mm) - flush-mount or surface-mount	Width	450			600		600						800															
	Height	450	600	750	900	1,200	500	800	1,100	800	1,100	1,400	1,100	1,400														
	Depth	85					150			250			350															
Weight ¹⁾ (kg)	Flush-mount	7.7	9.9	12	18.3	27	11.7	16.8	25.8	-																		
	Surface-mount	7.1	9.2	11.3	17.8	30.9	10.9	15.5	27.5	24.7	31.8	39.6	44.2	53.8														
Degree of protection (sheltered installation)	Flush-mount	IP3XD (closed door)					Up to IP30			-																		
	Surface-mount	IP3XD (closed door)					Up to IP55																					
Resistance to mechanical impact	IK-07					IK-05																						
Temperature	Maximum 40 °C / Minimum -5 °C																											
	(Average +35 °C for 24 hours)																											
Altitude	Up to 2,000 m																											
Applicable standards	IEC 61439-1 and 61439-3								IEC 61439-1 and 61439-2																			

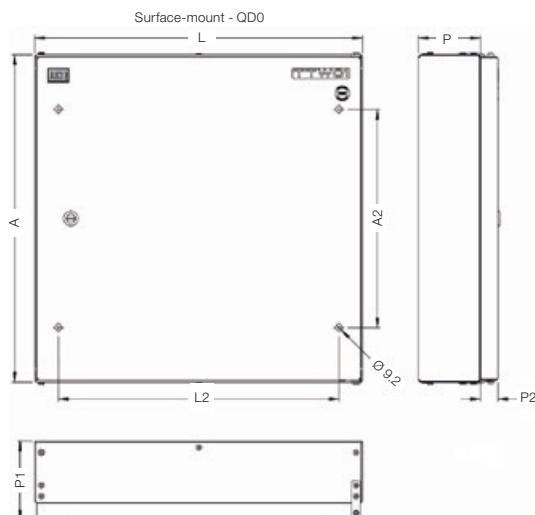

Note: 1) Weight of the empty enclosure, without electrical components.

Global presence

is essential, as much
as understanding
your needs.

Global Presence

With more than 30,000 employees worldwide, WEG is one of the largest electric motors, electronic equipments and systems manufacturers. We are constantly expanding our portfolio of products and services with expertise and market knowledge. We create integrated and customized solutions ranging from innovative products to complete after-sales service.

WEG's know-how guarantees our **TTW01-QD Type-Tested Assembly - Distribution Boards**

Boards are the right choice for your application and business, assuring safety, efficiency and reliability.

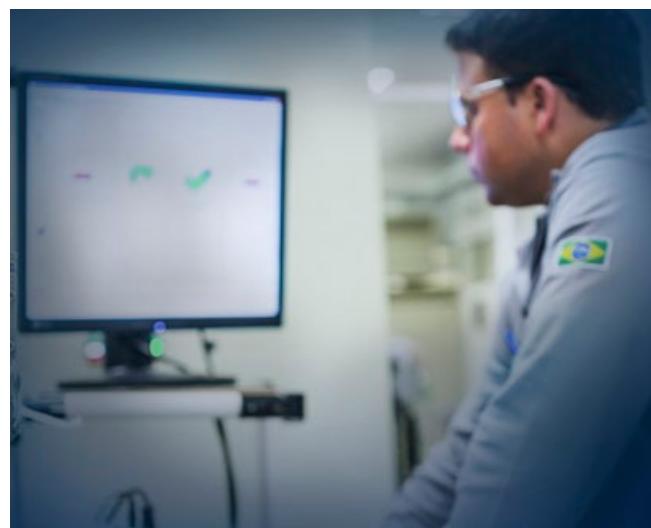

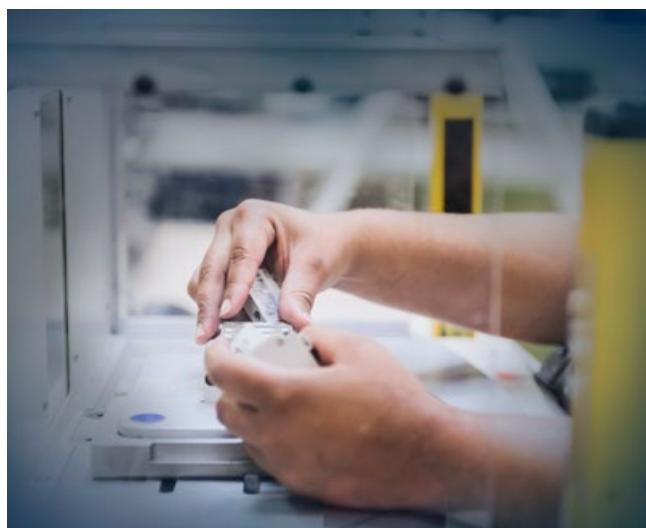

Availability is to have a global support network

Partnership is to create solutions that suits your needs

Competitive edge is to unite technology and innovation

Know More

High performance and reliable products to improve your production process.

Excelence is to provide a whole solution in industrial automation that improves our customers productivity.
