

Data Sheet

W-CAR TOUCH-UP SPREADER

	Product Description	It is a diluent with high solvency power and slow evaporation that provides better uniformity and leveling of the film. Used on touch-ups to prevent the seam from being visible in the retouched area.
	Mixing ratio	Shelf life: 3 years Ready to use.
	Hardener	Ready to use.
	Thinner	Ready to use.
	Application viscosity	Ready to use.
	Application gun	1,2 – 1,5 mm 2 - 3 BAR 30 - 45 PSI
	Evaporation at 25°C 77°F	Consult the Technical Data Sheet of the product to be diluted.
	Number of passes	After sanding, apply the spreader only to the sanded area.

- Perform a good degreasing to clean the part to be repainted
- Avoid excessive thickness
- Cleaning of application equipment with acrylic/polyurethane thinners
