

Data Sheet

W-CAR REMOVEDOR PASTOSO

	Product Description	Product used to remove old paint. It has a high concentration of active ingredients that attack the paint, making it easier to remove. Removal of old paints in general applied to various types of substrates, such as wood, metals, masonry. Not recommended for bumpers and plastic parts.
	Mixing ratio	Ready for use
	Hardener	Not applicable
	Thinner	Not applicable
	Application viscosity	Not applicable
	Application	Create porosity in the paint to be removed with 80 grit sandpaper to improve the efficiency of the product. Then apply the remover with a brush or spatula, spreading it over the entire surface. Wait 5 to 15 minutes and scrape off the wrinkled paint with a spatula. If necessary, reapply until the paint is completely removed. After removing the product, wash the piece with soap and water, then dry and clean with the degreasing solution.
	Evaporation at 25°C 77°F	5 - 15 minutes for the product to take effect.
	Number of passes	Repeat the process until the paint layer is completely removed.
	Shortwave infrared	Not applicable

- When opening the Paste Remover can, place one hand on the lid as there may be pressure inside the can causing the product to splash out
- Avoid excessive thickness cleaning of application equipment with acrylic/polyurethane thinners
- Use hardener and thinner as recommended;
- Always use the WEG product and complement set;
