

Starter Package Retrofit Solutions

Available Solutions for Upgrading Obsolete Industrial Refrigeration Starter Packages

Retrofit Replacement of Soft Starter Chassis

Economical solution for replacing outdated soft starter, or wye-delta starters, while retaining existing enclosure, oil pump starter, and other accessories. WEG has soft starter chassis replacement solutions that are proven to fit within the same space as legacy products in the IR Industry (i.e. Ram DBS, among others)

Ease of installation of the WEG SSW soft starter family of products allows for simple replacement and startup, resulting in quick replacement solutions. This results in minimum down time of your starter upgrade.

Complete Panel Replacement

WEG offers standard industrial refrigeration starter packages that provide a fast and complete replacement of outdated starter packages. This solution includes the enclosure and provides full replacement of all dated components for full panel warranty, and 65 kaic ratings.

Service and Support

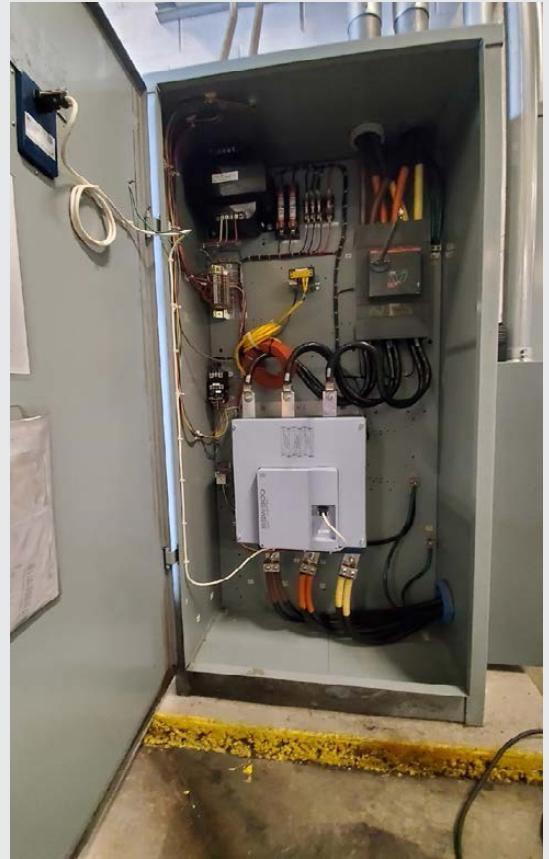

WEG service and support team is available 24/7 to assist with your retrofit needs. 877-934-3748
