SGS was hired by WEG S.A (here called "client"), located at Avenida Prefeito Waldemar Grubba, 3000, Vila Lalau, Jaraguá do Sul, Santa Catarina, Zip Code 89256-900, for the verification of the emissions direct and indirect from gases effect greenhouse from agreement with the

### ISO 14064-3: 2019

According to the willing in the Declaration of Gases of Effect Greenhouse in form of the inventory documented covering the Emissions of GHG of the period from 01/01/2024 to 12/31/2024.

### Functions and Responsibilities

The client is responsible for the organization's GHG information system, development and maintenance of records and reporting procedures under that system, including the calculation and determination of emissions of GHG and the report of the emissions of GHG.

It is the responsibility of SGS to express an independent opinion on the verification of the emissions of GHG according to the willing in the declaration of GHG.

SGS conducted a Third-Party verification of the GHG declaration provided against the principles of ISO 14064-1:2018 and ISO 14064-3:2019 and the Brazilian GHG Protocol Program in the period of 01/01/2024 to 12/31/2024. The verification was based on the scope of verification, objectives and criteria as agreed between the client and SGS in 03/10/2025 to 03/14/2025.

### Level Reliable

Verification with level of confidence Limited.

### Scope

The client requested one verification independent by SGS do Brasil Ltda of the report from emissions of GHG to establish compliance with the principles of ISO 14064 within the scope of verification as indicated below.

The data and information supporting the GHG declaration have been calculated based in monitored and historical data.

This commitment includes verification of emissions from anthropogenic sources of greenhouse gases included in organizational limits and is based on ISO 14064-3:2019.

- The organizational boundary was established following the operational control and shareholding approach.
- Title or description of activities: Electrical Equipment Manufacturer, Electronics, Inks, Varnishes and Resins and Digital Solutions.
- Location/limits of the activities visited: Avenida Prefeito Waldemar Grubba, 3000 – Vila Lalau – Jaraguá do Sul – SC - BR. (and other units see Annex I)
- Infrastructure physics, activities, technologies, and processes of organization: Operational Area, Administrative Area.
- GHG sources, sinks and/or reservoir included: this inventory includes GHG emissions Scope 1, Scope 2 and Scope 3.

**Scope 1:** Direct emissions: Mobile Combustion, Stationary Combustion, Fugitive Emissions, Industrial Processes, Agricultural Activities, Waste generated in operations.

**Scope 2:** Indirect emissions - Electricity consumption with a location approach and purchase choice.

**Scope 3:** Indirect emissions of the following categories: Purchased goods and services; Capital goods; Fuel and energy related activities not included in Scope 1 and 2; Transport and distribution (upstream); Waste generated in operations; Business trips; Employee displacement (home-work); Use of sold goods and services

- Kind from GHG Considered: CO<sub>2</sub>, CH<sub>4</sub>, N<sub>2</sub>O, HFC, PFC, SF<sub>6</sub> and NF<sub>3</sub>.
- Actions Directed: Not applicable.
- The information from GHG for the period: 01/01/2024 to 12/31/2024.
- Verification declaration users: WEG S.A.

### Objective

The objective of verification is the revision of evidence objective and a review independent for determine:

- Whether GHG emissions are as stated by the organization's GHG declaration.
- Whether the reported data is correct, complete, consistent, transparent, and free of errors or omissions.

### Criteria

Criteria according to which the verification is carried out are the principles of ISO 14064:2018 and the Brazilian GHG Protocol Program.

### Materiality

The materiality required for verification was considered by SGS as 5%, according to the need for the declaration of Gases of Effect Greenhouse.

### Conclusion

The client provided the GHG declaration based on requirements of ISO14064-1:2018 and the GHG Report Protocol. GHG information for the period 2024, which contains the emissions presented in the tables to continuation has been verified by SGS with one level of confidence limited of agreement with the scope of verification the objectives and the criteria agreed.

SGS's approach is based on understanding the risks associated with reporting GHG emissions information and controls to mitigate them. Our review included the evaluation of relevant evidence-based in evidence related with the amounts and the information envelope the emissions of GHG informed by organization.

Our work of verification the information, explanations, and evidence what we consider necessary to obtain a limited level of confidence that GHG emissions for the period of the year 2024 herself established reasonably.

We conduct our verification in accordance with the client's GHG declaration including verification of the GHG information system, monitoring and reporting. This verification included than the provisions of the reference protocol were consistently and properly applied.

**In opinion of SGS, the declaration of GHG presented:**

- Is materially correct and is one representation of the data and information of the GHG, and
- It was prepared in accordance with the ISO14064-1:2018 on GHG quantification, monitoring and reporting.

This declaration must be interpreted together with the declaration of GHG of the client.
